

SHIYAO WANG

swangwang2000@gmail.com | (+64)0212305686 | [GitHub](#) | [LinkedIn](#) | [shiyaowaang.com](#)

TECHNICAL

Software GIT, Docker, MongoDB, MS Office Suite, Autodesk Fusion
Software Languages Javascript/Typescript, Python, Golang, SQL, NoSQL
Spoken Languages English, Mandarin
Experienced in using Windows and Linux operating systems

WORK EXPERIENCE

AsBuilt *November 2020 - January 2025*
Junior Software Engineer

- Create/fix/maintain features and packages across frontend(React + js/ts) and backend (echo + Golang)
- Taken the lead on some larger features and run stand-ups/retros
- Work closely with the design team to resolve technical issues and come up with alternative solutions
- Experience in using MS Azure services (blob storage, dockerized image management, PIM)

AsBuilt *December 2019 - February 2020*
Software Engineer Intern

- Research and development of some POC applications based around Autodesk's Forge-Viewer API
- Use the Forge-Viewer API to manipulate and interact with 3D elements on a web application
 - API data ingestion of IOT devices and display them as meaningful graphs
 - Meta data extraction of uploaded JPEG images and plot them geographically on a web application

EDUCATION

University of Auckland *March 2018 - November 2021*
Bachelor of Engineering (Hons) in Computer Systems Engineering

University of Auckland *March 2025 - Present*
Master of Engineering in Computer Systems Engineering

PROJECTS

Computer vision aided reinforcement learning *2025*

Capture and process RGBD data using various methods to get state information of robotic ligaments and its environment to be used as input for reinforcement learning of physical tasks performed by the ligaments.

- Photogrammetry using RGBD data from Intel RealSense cameras
- Instance segmentation and keypoint detection using Detectron2
- Data processing with various algorithms to get state information for reinforcement learning
- 3D modeling/printing and assembly of robotic ligaments + rigs

Blog Site: [ribbit.moe](#) *2024*

Host a blog site where users can make an account and share posts publicly or privately

- React framework for front-end written in TypeScript
- Echo framework for back-end written in Golang
- NoSQL Database hosted with MongoDB
- Webapp hosted on Google Cloud using Cloud-run running dockerized images
